

HARUN UR RASHID

Researcher | 5G/6G Networks | AI & Reinforcement Learning | ITU-T Standardization
Hankuk University of Foreign Studies (HUFS), Republic of Korea

 harun@hufs.ac.kr  +82-10-8902-9357  Harun-Ur-Rashid-3  harunmec/

PROFILE

Researcher specializing in 5G/6G networks, AI/ML-based network optimization, and intelligent RAN management, with research interests in network slicing, radio resource allocation, handover management, CoMP, and federated learning. Active contributor to international standardization through ITU-T Study Groups and the FG-EAI, with experience in technical contributions, recommendation development, and reference architecture editing.

EDUCATION

PhD in Information and Communications Engineering — Hankuk University of Foreign Studies (HUFS), Republic of Korea | 2021–Present

Master's Degree — Cukurova University, Turkiye | 2018–2021

Bachelor's Degree — University of Dhaka, Bangladesh | 2012–2017

PROJECTS & STANDARDIZATION

- Reference Architecture for Embodied AI — **ITU-T Focus Group on Embodied AI (FG-EAI), WG1/TG1.2** | **Ongoing** | **Editor**.
- Fixed, mobile and satellite convergence - AI-based network function offloading (ANFO) for IMT-2020 networks and beyond — **ITU-T SG13, Q13** | **Ongoing**
- Requirements and framework for distributed machine learning-based remote monitoring services for multimedia applications — **ITU-T SG21, Q5** | **Ongoing**
- Framework for AI-based performance evaluation of IMT-2020 networks and beyond — **ITU-T SG12, Q17** | **Ongoing**
- Approved International Standard **ITU-T Recommendation Y.3224** on *Fixed, mobile and satellite convergence - Requirements and framework for in-network aggregated federated learning for enabling AI in IMT-2020 networks and beyond*

SELECTED PUBLICATIONS

- **Self-Supervised Reinforcement Learning for Coordinate Multipoint Handover Management**, *IEEE Transactions on Communications*, 2026 (Under review)
- **Decentralized Multi-Agent Implicit Q-Learning for Urgency-Aware 5G RAN Slicing with Joint Bandwidth and Numerology Optimization: An Offline Reinforcement Learning Approach**, *Journal of Network and Computer Applications*, 2026 (Under review)
- **Offline Reinforcement Learning for Urgency-Aware 5G RAN Slicing without Exploration-Time QoS Violations**, *Engineering Science and Technology, an International Journal*, 2026 (under review)
- **Position-Aided Channel Quality Indicator Prediction in V2X Scenarios using Attention-LSTM with Fully Convolutional Networks**, *Journal of Network and Systems Management*, 2026.
- **Optimizing Handover Decisions with Skipping Mechanisms in 5G mmWave UDNs using Reinforcement Learning**, *Computer Networks*, 2026.
- **Federated Few-Shot Prototypical Learning for Personalized WiFi-based Human Activity Recognition**, *IEEE Access*, 2026.
- **AI Empowered 6G Technologies and Network Layers: Recent Trends, Opportunities, and Challenges**, *Expert Systems with Applications*, 2025.

RESEARCH EXPERTISE & SKILLS

5G/6G & RAN: Network Slicing, Radio Resource Management, CoMP, Handover, V2X, Private 5G

AI/ML: Reinforcement Learning, Deep Learning, Federated Learning, AI-based Network Optimization

Standardization: ITU-T Contributions, Technical Recommendations, Requirements, Architectures, Reference Architectures

Tools: Python, PyTorch, TensorFlow, srsRAN, Open5GS.

AWARDS & ACTIVITIES

Best Paper Award, ICMIC 2025 | **Member, Korean Institute of Communications and Information Sciences (KICS)**
ITU-T SG12/SG13/SG21 Contributor | **FG-EAI WG1/TG1.2 Editor**
